

### **REMARKS/ARGUMENTS**

The Office Action of August 23, 2007, has been carefully reviewed and these remarks are responsive thereto. Reconsideration and allowance of the instant application are respectfully requested.

The Office Action of May 14, 2007, restricted the claims as follows:

- Species I: Fig. 5
- Species II: Fig. 2

In response, Applicants elected the Species of Fig. 2 with traverse, arguing that the restriction was improper because the species are not mutually exclusive. Applicant's response also indicated that all claims 1-48 correspond to the generic species of Fig. 2.

The Office Action of August 23, 2007, apparently makes the same restriction requirement, in response to which Applicants again elect the species of Fig. 2, with traverse, to which all of pending claims 1-48 correspond.

Applicants again respectfully submit that the species of Fig. 2 and Fig. 5 are not mutually exclusive. Indeed, the Office Action's response in paragraph 1 does not indicate how Fig. 2 and Fig. 5 are allegedly mutually exclusive. Rather, Office Action provides no evidence or support as to why or how the species of Fig. 2 would be precluded from distorting content in a frame as is suggested in Fig. 5. That is, the species of Fig. 2 is generic insofar as it may be used in environments that do and that do not distort content in a frame.

Applicants therefore respectfully traverse the restriction requirement, which appears to be duplicative of the restriction issued in the Office Action of May 14, 2007. If the Office believes

Appln. No.: 10/691,450  
Response dated September 24, 2007  
Reply to Office Action of August 23, 2007

that Applicant's representatives are misunderstanding the nature of the restriction requirement,  
the Office is invited to contact Applicant's undersigned counsel at (202) 824-3153.

Respectfully submitted,  
BANNER & WITCOFF, LTD.
